SYNAQ

From a standalone armchair to an extensive corner configuration. Synaq is a modular sofa available in one-, two- or three-seat versions, with optional armrests, or it can be combined into almost endless linear and corner arrangements. Soft upholstery and a high level of comfort make it a natural place for relaxation, meetings and informal collaboration.

Introduction and modules The Synaq sofa offers a high degree of flexibility and can be adapted to the layout and intended use of the space. The final configuration is created using the following basic modules:

SQ 5501 – single-seat sofa without armrests

SQ 5502 – two-seat sofa without armrests

SQ 5503 – three-seat sofa without armrests

The right and left sides of each module can be configured according to the required arrangement by adding an armrest or a corner backrest. The corner backrest can form the end of a standalone sofa or serve as a connecting element when creating corner configurations.

End configuration options:

- right and left armrest
- right and left corner backrest
- armrest on one side and corner backrest on the other

Description The seat consists of a wooden frame with stretched elastic webbing and high-quality moulded PUR foam, 120 mm thick, with a density of 60 kg/m³, providing a high level of seating comfort.

The backrest and armrests are made of a wooden sandwich construction and high-quality moulded PUR foam with a density of 55 kg/m

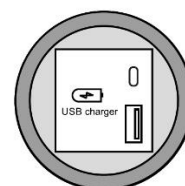

Base The supporting frame is a welded structure made of bent metal tubing Ø 32 × 2 mm and bolted rectangular steel profiles 50 × 30 × 2 mm, finished with black powder coating.

Accessories Metal base – other RAL colours available on request
Solid oak base
