LAMBDA LA 4002.070

Manufacturer: RIM CZ a. s.  
Design: Vrliška & Žák

## LAMBDA LA 4002.070

Multipurpose chair of contemporary design. Thin and subtle construction provides extraordinary comfort of sitting. Functional shape, low weight and excellent stacking suggest easy manipulation making Lambda the perfect choice for large rooms. However, different color and upholstery options of the shell and several base designs suggest the chair for many other interior settings – from a coffee shop up a cozy home office.

---

<b>Description</b>	All-plastic shell made of polypropylene (PP). Upholstered seat is made of a pressed 3-layer beech plywood with glued PUR foam cut (th. 15 mm). The seat segment is firmly attached to the plastic shell with screws. Plastic cover on the lower side of the seat prevents from damage when stacking.
<b>Upholstery</b>	As per selection from current fabric offer.
<b>Base</b>	<b>.070</b> – Structure without armrests is made of a steel wire ø 11 mm bent in one unit. Sides are reinforced with crossbar in the front, placed high enough to prevent from discomfort when sitting. The wire has no sharp edges, screwed-in plastic glides. Black powder color or chrome finish.
<b>Plastic components</b>	Standard colors: black, red, light grey, greyish blue, beige, olive green  On request: Fire-resistance according to the norm UNI9177 – fire reaction class 1 - MOQ 200 pcs.  The color of plastic parts depends on the color of the shell.
